

Grandfather Clock Curio

This is a picture of the Grandfather Clock Curios I built for our kids and their wives for Christmas 2001. They are made of Oak, stand 6' tall, are 12-3/4" wide and 14-1/4" deep and were very challenging to build. I purchased a plan, but it was very basic - "I had to punch it up a little". The scroll work at the top and on the bottom are of my own design and all the shelves are adjustable.
